

<Bolsa Futuro Digital>

<aula extra>

Turma de FrontEnd – IF UFRGS

● Dicas de boas práticas

Ao programar devemos seguir algumas **regras**, ou **hábitos**, para que nossos códigos funcionem da melhor forma possível.

Criando arquivos: o nome de um arquivo deve ser em letras minúsculas, sem espaços, sem acentos e sem símbolos. Utilizar apenas os traços (- ou _) para dar espaço, o ponto deve ser usado apenas para separar o formato. Não usar ç também. **Exemplos:**

✓ aula1.html - exercicio-aula-1.html - style_aula2.css

✗ Aula1.html - exercício aula.1.html - Style aula#2.css

● Dicas de boas práticas

A mesma regra serve pastas, no dia a dia podemos usar qualquer nome em nossas pastas, mas as pastas onde ficam nossos códigos devem ter o mesmo padrão.

Criando pastas: o nome de uma pasta deve ser em letras minúsculas, sem espaços, sem acentos e sem símbolos. Utilizar apenas os traços (- ou _) para dar espaço. Não usar ç ou o ponto também. **Exemplos:**

✓ aula1 - exercicios-aula-1 - estilos - imagens_para_site

✗ Aula1 - Exercício aula 1 - Estilos - Imagens para site

● Organização

● Comentários

`<!-- comentário HTML -->` `/* comentário CSS */`

```
<header>
  <!-- Nome da empresa -->
  <h1>Meu Site</h1>

  <p>Bem vindo ao meu Site!</p> <!--Provisório-->

  <!-- Adicionar foto do time -->
</header>
```

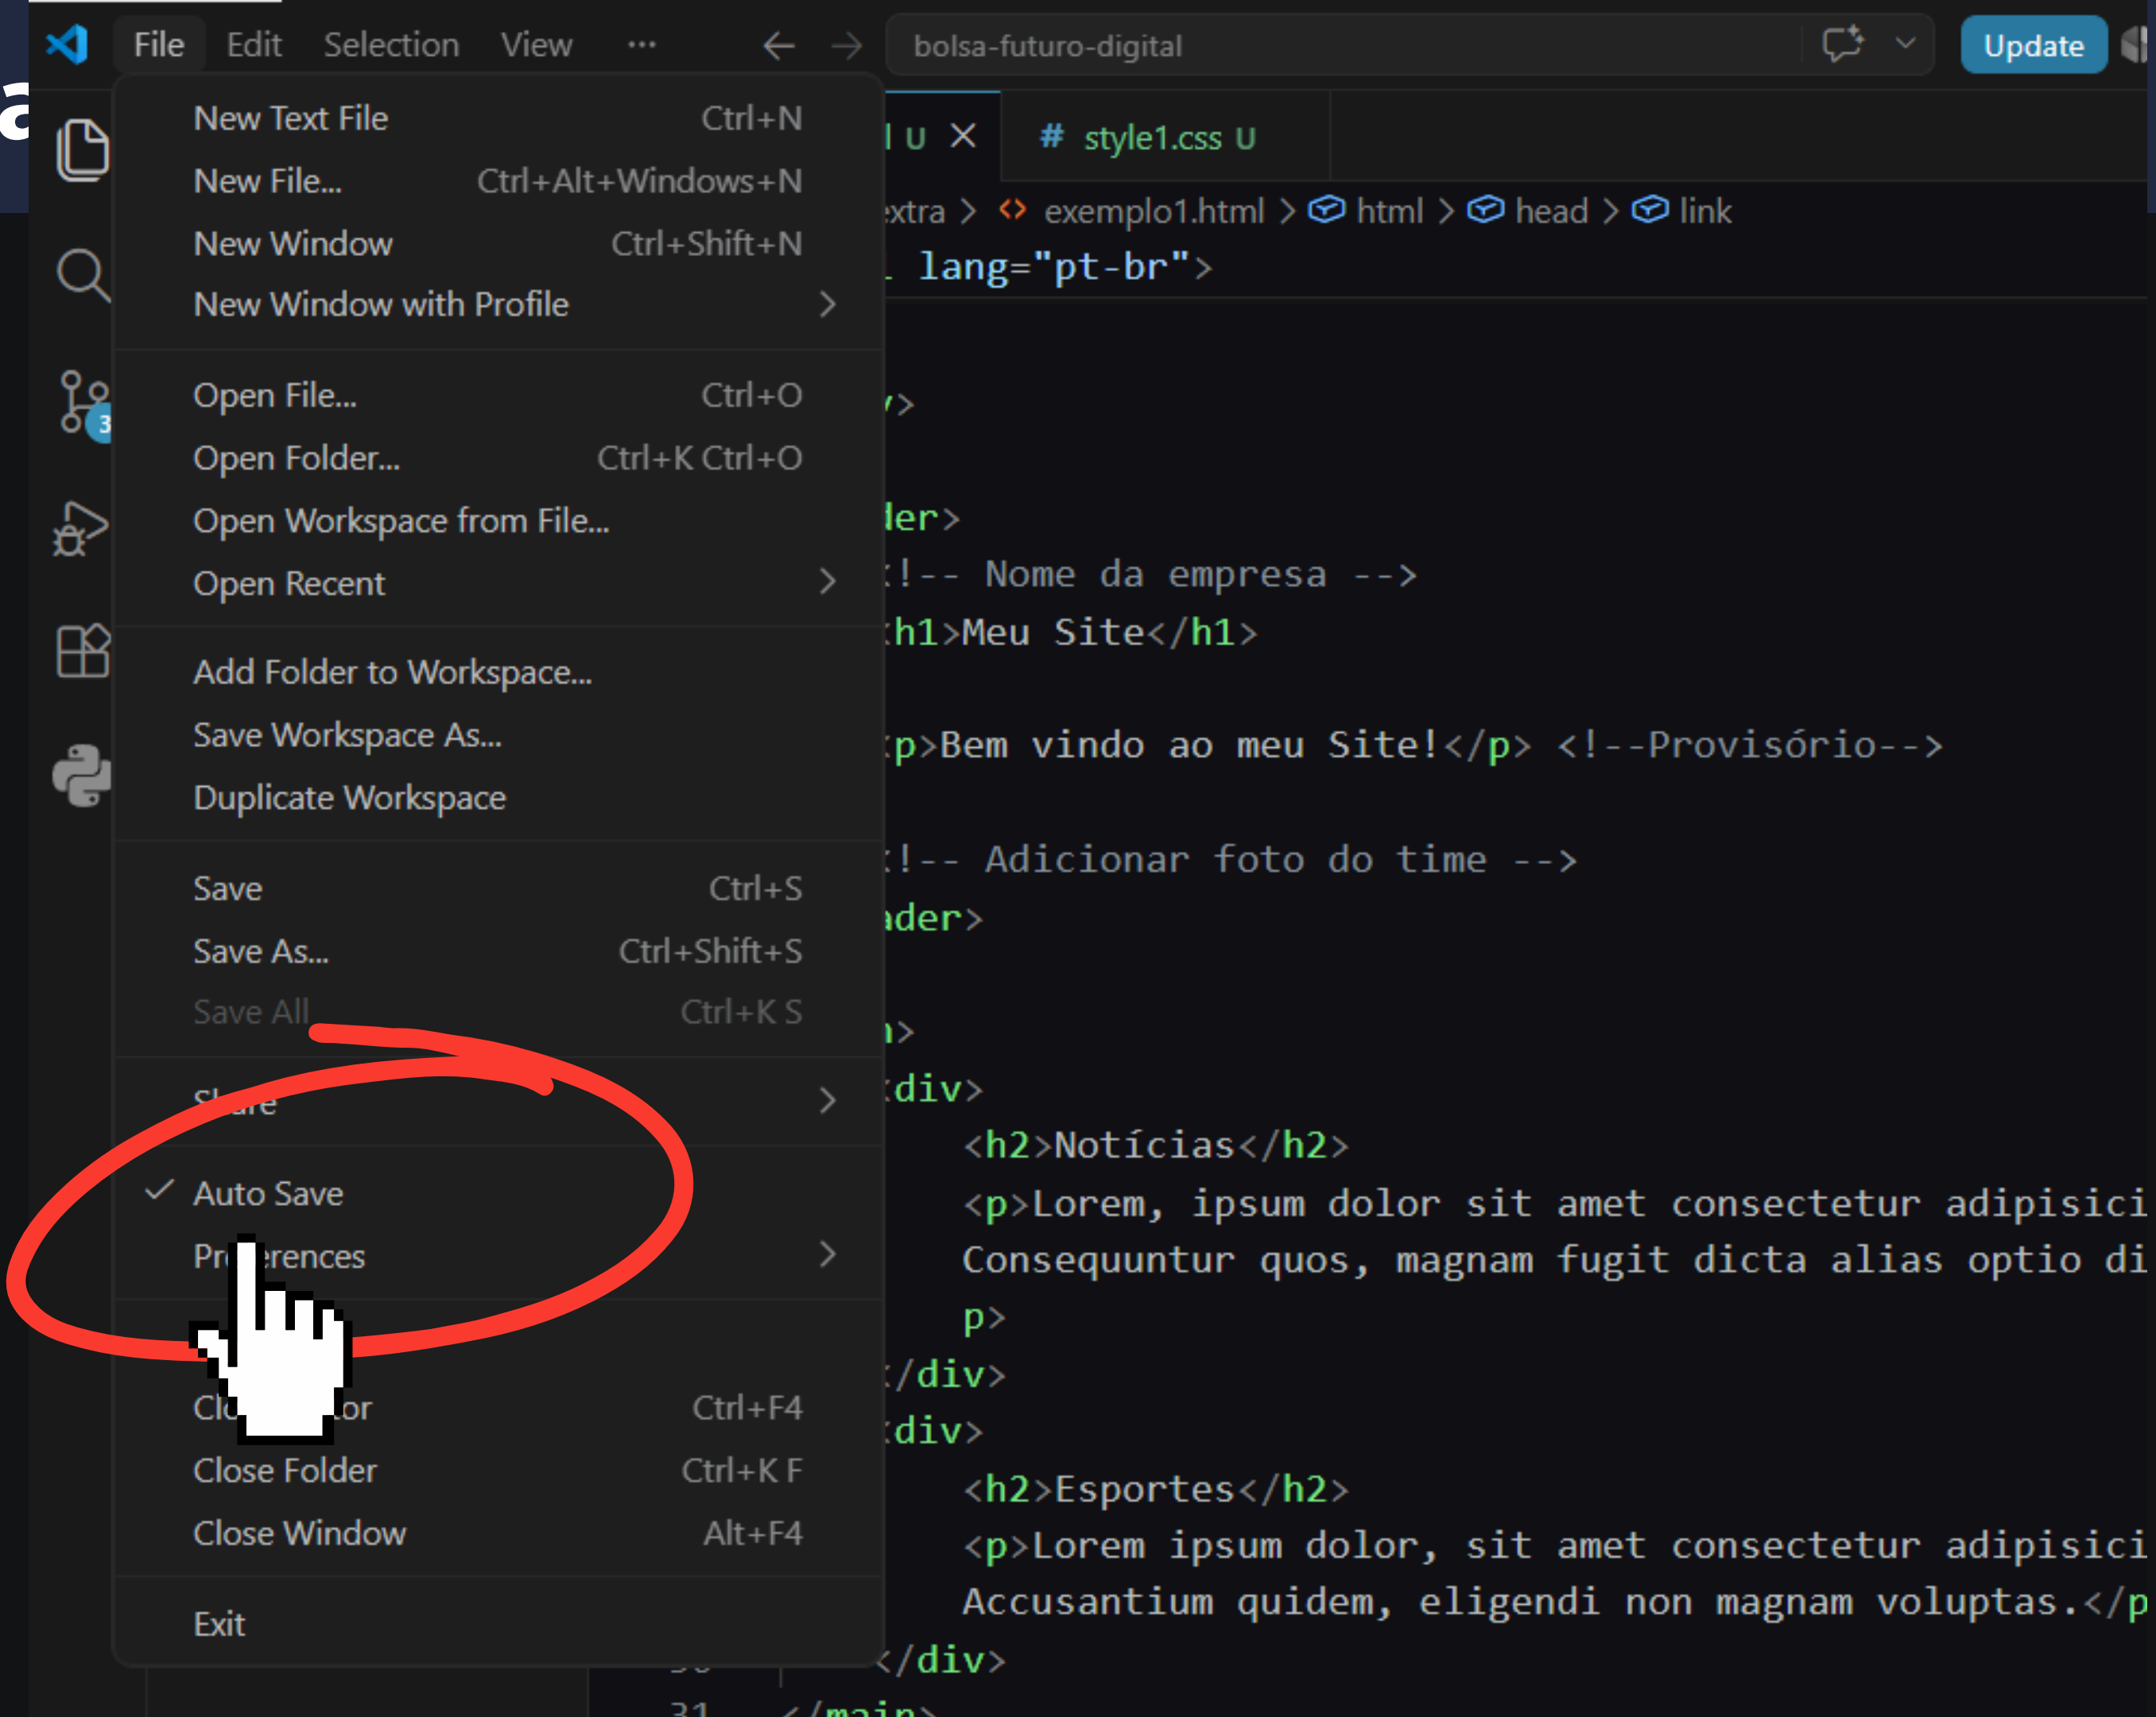

```
@charset "UTF-8";

/* Comentários em CSS */

body {
  margin: 10px;
  padding: 5px;
  /* Conferir cores escolhidas */
  background-color: ■ #cc772d;
}
```

● Visual Studio Code – Autosave

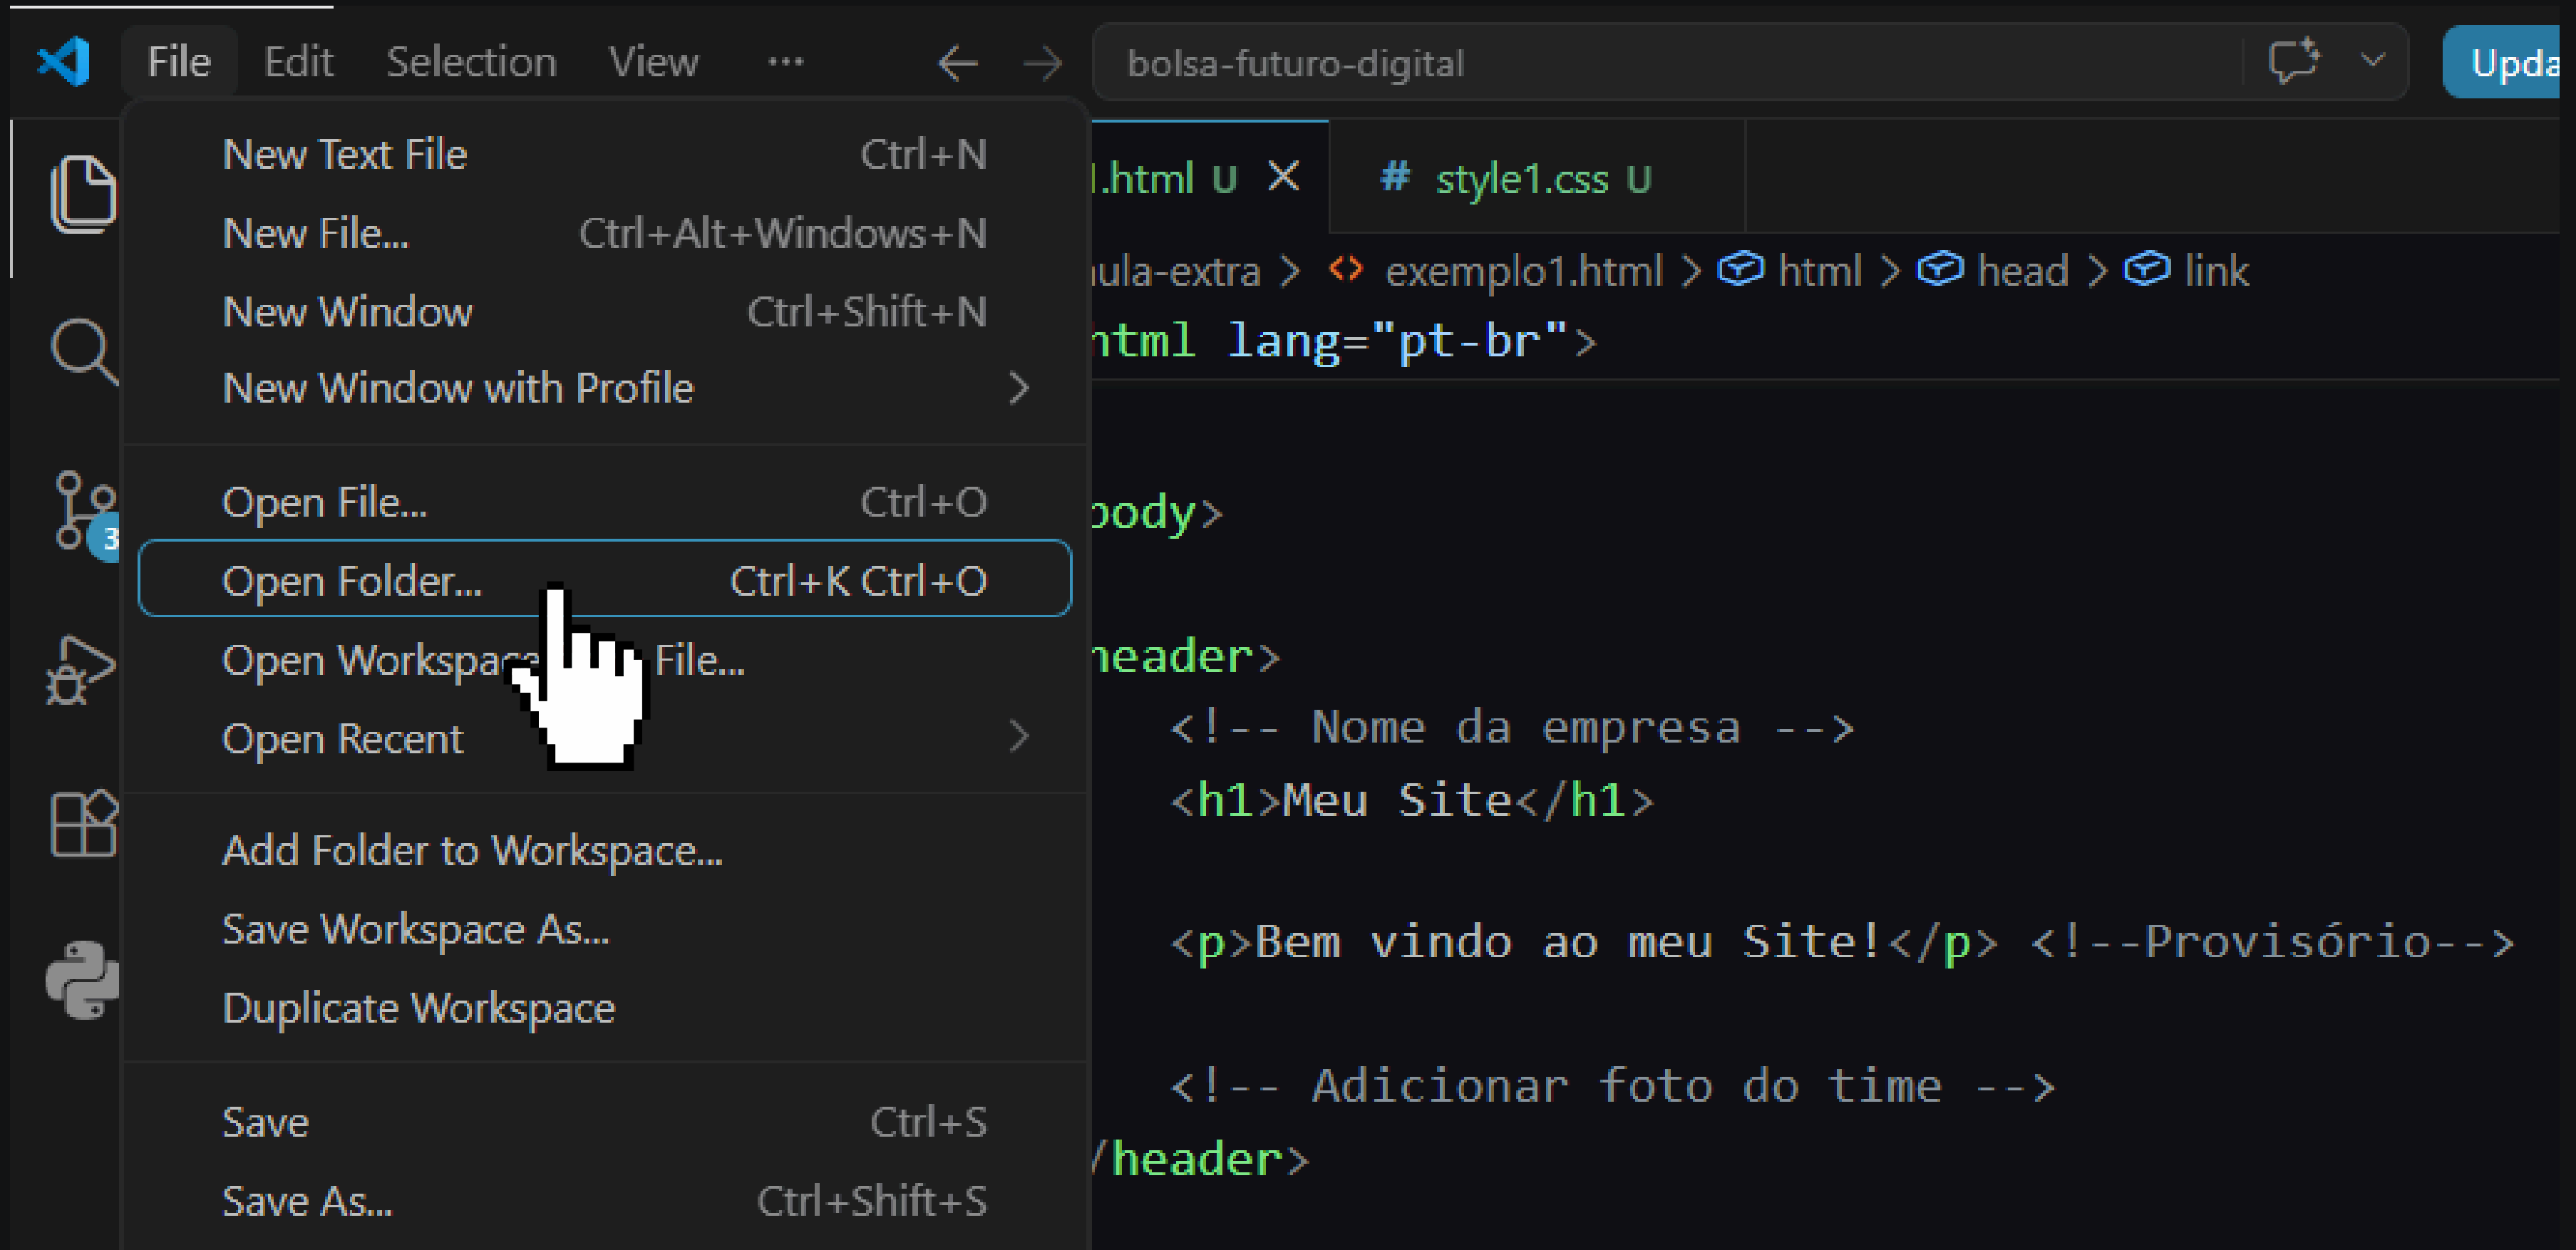

● VS Code – Pastas e arquivos

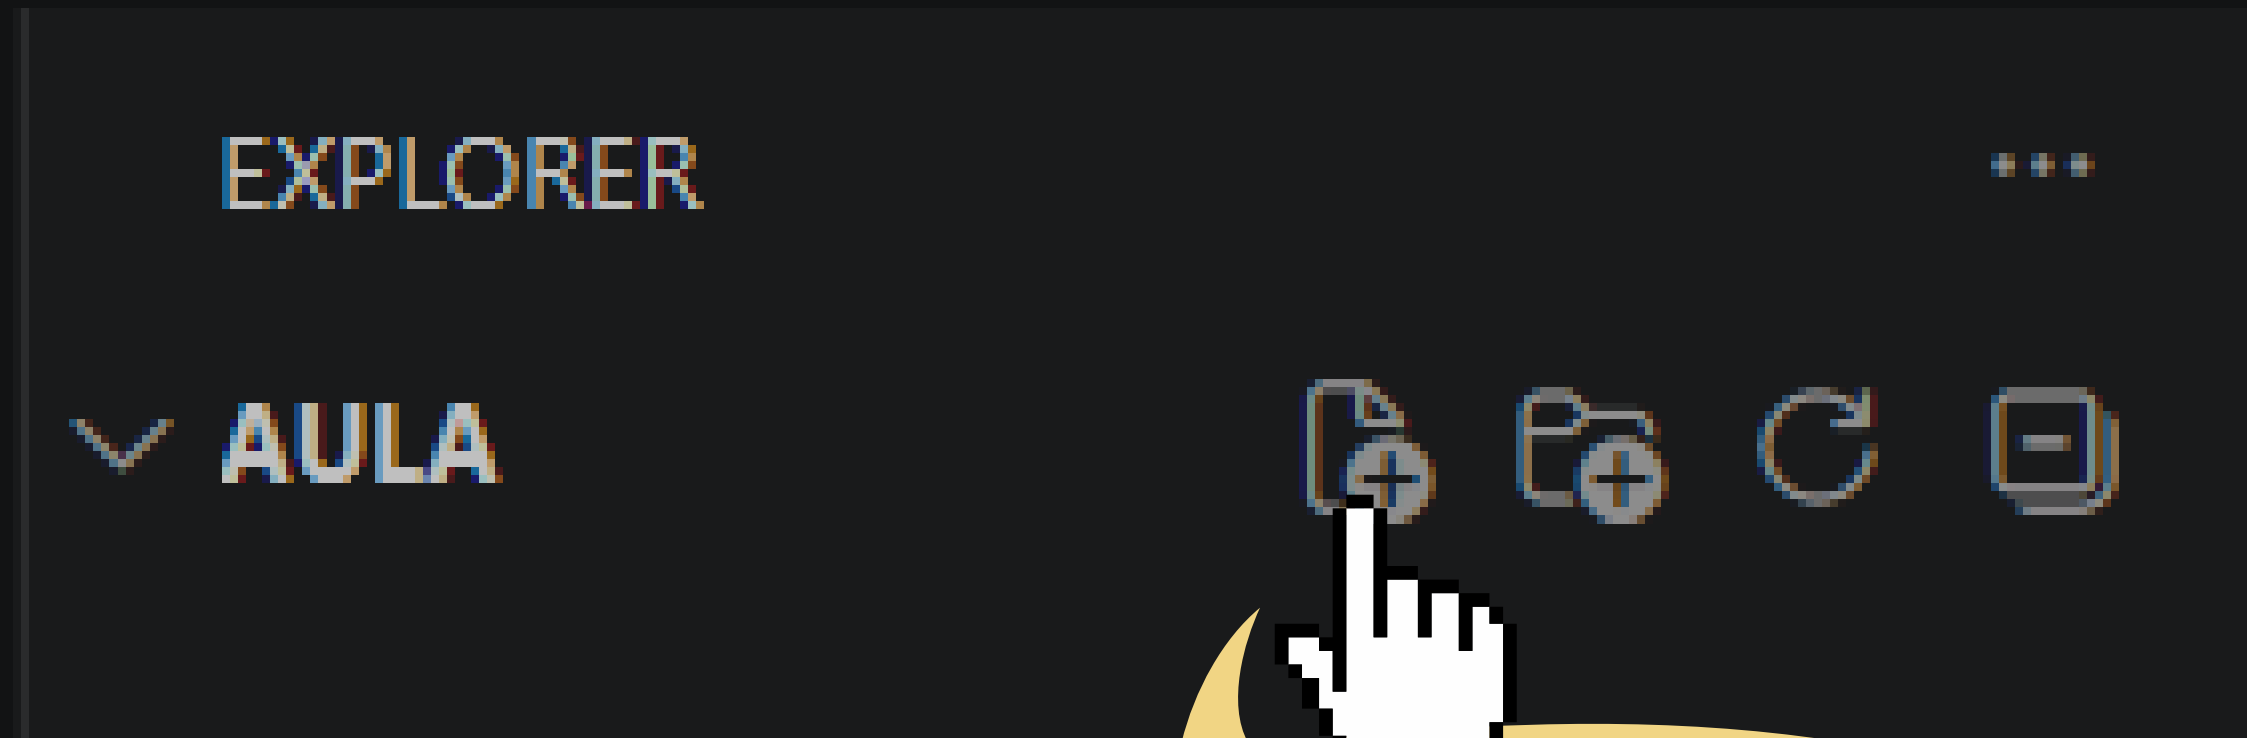

The image shows the Visual Studio Code (VS Code) interface. A red circle highlights the top menu bar, specifically the 'File' menu, which is being clicked by a mouse cursor. The 'File' menu is open, showing a list of files and folders. The 'BOLSA-FUTURO-DIGITAL' folder is expanded, showing subfolders 'html-css' and 'aula-extra'. The 'aula-extra' folder is also expanded, showing files 'exemplo1.html' and 'style1.css'. The 'exemplo1.html' file is selected. The code editor on the right shows the content of 'exemplo1.html', which is an HTML document with a header and a body. The code is as follows:

```
2 <html lang="pt-br">
10
11 <body>
12
13 <header>
14     <!-- Nome da empresa -->
15     <h1>Meu Site</h1>
16
17     <p>Bem vindo ao meu Site
```

```

The Command Palette is open, displaying the following options:

- Command Palette... Ctrl+Shift+P
- Profiles
- Settings Ctrl+,
- Extensions Ctrl+Shift+X
- Keyboard Shortcuts Ctrl+K Ctrl+S
- Snippets
- Tasks
- Themes >
- Backup and Sync Settings...
- Show Update Release Notes
- Restart to Update (1)

A hand cursor is pointing at the 'Settings' option. The 'Settings' option is highlighted with a blue border. The 'Restart to Update (1)' option is circled in red.

The status bar at the bottom shows the following information:

- Ln 3, Col 7
- Spaces: 4
- UTF-8
- CRLF
- HTML
- Go Live

● VS Code – Word Wrap permanente

The screenshot shows the VS Code Settings interface. At the top, there's a 'Settings' title bar with window controls. Below it is a search bar labeled 'Search settings'. The 'User' tab is selected, and a 'Backup and Sync Settings' button is visible. The left sidebar lists categories under 'Commonly Used', including Text Editor, Workbench, Window, Chat, Features, Application, Security, and Extensions. The main panel also displays 'Commonly Used' settings:

- Editor: Font Size**
Controls the font size in pixels.
Value: 16
- Editor: Format On Save**
☒ Format a file on save. A formatter must be available and the editor must not be shutting down. When [Files: Auto Save](#) is set to `afterDelay`, the file will only be formatted when saved explicitly.
- Files: Auto Save**
Controls [auto save](#) of editors that have unsaved changes.
Value: afterDelay
- Editor: Default Formatter**
